SYSTEM

Flat mop system with double sided frame, to be used with pre-soaking, soaking on demand with soaking station or with the convenient wringer
Ideal for environments that combine smooth and porous or non-slip surfaces

GREEN BOX

DECITEX of the fibres

Wet 1 fabric

Microfibre: 0,16 DTX

Safe fabric

Microfibre: 0,58 DTX - Multifilament: 3,48 DTX - Abrasive fiber: 50 DTX

Efficient: microfibre requires less chemical to remove dirt and bacteria, reducing water and chemical consumption

100% cleaning material, no waste along the whole product's functional life

Advantages

- **Multipurpose:** the combination of different fibres allows making many operations with one single mop
- **Easy:** mop changing is easy and quickly
- **Highest hygiene:** microfibre penetrates into the microporosity of the floor, collecting dirt and more than 95% of bacteria
- **Touch-free:** the detaching system avoids any contact with the dirt
- If used with the pre-soaking system, you cut the quantity of necessary mops in half thanks to the two cleaning sides
- If used with the wringer, you go back to the bucket to rinse and wring out the mop half the times as the two cleaning sides of the mop double the dirt collection power

Material

Wet 1 fabric: 85% polyester, 15% polyamide - Safe fabric: polyester

Packaging: [click here to see the environmental labelling of packaging](#)

Washing conditions

Guidelines for proper fibre maintenance

Follow the washing instructions (temperatures and dosage) on the laundry detergent packaging
Perform a pre-wash in cold water without laundry detergent to remove any residual product used during cleaning operations

Recommended use of professional textile laundry detergent

Do not use fabric softener

Do not use laundry detergents with Ph> 11

The use of laundry nets is recommended to speed up and make laundry operations more hygienic

Specific mop instructions

Washing temperature max 90° C, recommended 60°

Bleaching possible, do not use chlorine

Tumble dry or in a dryer possible with low program
